

## **Luna**

A ball of fire lays to rest  
Setting down in the west  
Upon his descent, he leaves an alluring sky  
Full of pink, orange, and yellow  
A beautiful sky to begin nightfall

As this sky fades to night  
Luna rises to take his place  
As she rises, stars appear to accompany her  
The glittering stars compliment pale Luna  
She looks down upon us  
As we dream of everything great
