

Cherry Blossoms

First we see,
in the springtime,
shiny green leaves
dancing in the breeze.
Then comes delightful
iconic pink-white blossoms
on the tree so bright.
A sweet fragrance
floats through the air.
What a treat!
The bees love the scent
and buzz around content.
Hovering for hours among
the delicate blossoms,
which are awesome.
Birds sit on the branches
singing a cheery song,
as a carpet of pinkish
petals cover the ground.
Cherry blossoms date
back in time.
People celebrate with
themed events every time.
