

Diversity

Please, I ask for your attention
for I've things I'd like to mention:

Bluegreen algae, pouched koalas
destroying angels, svelte impalas
flatworms, urchins, leaping reeboks,
Homo sapiens, northern goshawks

Horsetails, redwoods, naked mole rats,
long-horned beetles, mosses, wombats
leopards, lemurs, blue-winged teals
geckos, fruit bats, electric eels

Civets, curlews, dog-like dholes
salmon, aardwolves, star-nosed moles
roundworms, baboons, army ants
two hundred million types of plants

Poison dart frogs, amaranths
cassowaries, coelacanth
tarsiers, tapirs, bumblebees
ibex, ibis, maple trees

I must confess it makes me happy
just to know there's still okapi
and there also are some bongo
living with them in the Congo.
