

### **The Difference Between Night and Day**

The difference between night and day  
Everyone claims it is so much  
Always using the phrase to compare opposites

But truly what is so different  
Less than an hour  
The sun fades away into the horizon  
The darkness creeps across the sky  
Engulfing the light that filled our day  
That is what people think of the night  
It swallows the light  
Basking everything in the darkness  
But truly the light is no different  
When morning comes the light edges away the darkness  
Intruding and flooding the world with light  
Pushing out the darkness

They are so similar...  
So why do we act as if they are so different  
What is the difference between night and day?
