

Nature's Awakening

Winter's blanket slowly melts away
A sign that bright colors and warm weather is on the way
The bare trees sprouting green buds
And the beginning of spring time mud
Early spring is full of constant ups and downs
Bright sunshine smiles and cloudy frowns
As the season continues
Warmth and colors are nature's menu
Also awakening are the sounds
The birds and bees abound
Children playing, gentle breezes swaying
Nature's awakening is a welcome relief from the winter sleeping
